Advanced Cardiac Life Support (ACLS) Provider Handbook Karl

Disque 2016-11-14 The Save a Life Initiative has just released its newest course: Advanced Cardiac Life Support (ACLS). This manual is based on the 2015-2020 Advanced Cardiac Life Support guidelines published by the American Heart Association. The Advanced Cardiac Life Support (ACLS) Provider Handbook is a comprehensive resource intended for health care professionals currently enrolled in an Advanced Cardiac Life Support Certification or Recertification Course. It serves as the primary training material for ACLS Certification and Recertification courses. Although it is primarily intended

for use during their courses, the handbook was also created to serve as daily reference material for health care professionals. Information covered in the handbook includes ACLS instruction for adults and children through multiple case scenarios. Case scenarios include, but are not limited to, respiratory arrest, ventricular fibrillation and bradycardia. Specific ACLS Algorithms and more are also included within the handbook. All material included in this handbook is delivered in a manner meant to enhance learning in the most comprehensive and convenient way possible.

In this book we give you all the essential information that you will need to successfully pass the certification course and exam on your first attempt. Joe and I have been teaching this course to healthcare professionals and students since 1984. We know what works and what doesn't when it comes to helping our students be successful. We had to develop almost all of the study materials for our students by ourselves because very little existed at the time. The Zombie Notes Study Charts were some of the first study aids we

developed to help our students learn a large amount of information very quickly. We know that this format works very well because hundreds of thousands of healthcare professionals and students, in hospitals and colleges all over the world, have used this handy, no-nonsense chart to help them successfully pass the ACLS certification exams. Therefore, in order for you to be successful on the certification exam, and on the job, we expect you to memorize every bit of information contained within the Zombie Notes Study Charts and within this book. It is essential that you know this information by heart

and can recall it at a moment's notice. This information is not only essential for the exam, but for your career, and the survival of your patients, as well.

Strategies to Improve Cardiac

Arrest Survival Institute of

Medicine 2015-09-29 Cardiac

arrest can strike a seemingly

healthy individual of any age,

race, ethnicity, or gender at any

time in any location, often

without warning. Cardiac arrest

is the third leading cause of

death in the United States,

following cancer and heart

disease. Four out of five cardiac

arrests occur in the home, and

more than 90 percent of

individuals with cardiac arrest

die before reaching the hospital.

First and foremost, cardiac

arrest treatment is a community

issue - local resources and

personnel must provide

appropriate, high-quality care to

save the life of a community

member. Time between onset

of arrest and provision of care

is fundamental, and shortening

this time is one of the best

ways to reduce the risk of death

and disability from cardiac

arrest. Specific actions can be

implemented now to decrease

this time, and recent advances

in science could lead to new

discoveries in the causes of,

and treatments for, cardiac

arrest. However, specific

barriers must first be addressed. Strategies to Improve Cardiac Arrest Survival examines the complete system of response to cardiac arrest in the United States and identifies opportunities within existing and new treatments, strategies, and research that promise to improve the survival and recovery of patients. The recommendations of Strategies to Improve Cardiac Arrest Survival provide high-priority actions to advance the field as a whole. This report will help citizens, government agencies, and private industry to improve

health outcomes from sudden cardiac arrest across the United States.
