European Anthropologies Andrés Barrera-González 2017-08-01 In what ways did Europeans interact with the diversity of people they encountered on other continents in the context of colonial expansion, and with the peasant or ethnic 'Other' at home? How did anthropologists and ethnologists make sense of the mosaic of people and societies during the nineteenth and twentieth centuries, when their disciplines were progressively being established in academia? By assessing the diversity of European intellectual histories within sociocultural anthropology, this volume aims to sketch its intellectual and institutional portrait. It will be a useful reading for the students of anthropology, ethnology, history and philosophy of science, research and science policy makers.

Forest governance by indigenous and tribal peoples Food and Agriculture Organization of the United Nations 2021-03-25 The document summarizes the report that, based on a review of more than 250 studies, demonstrates the importance and urgency of climate action to protect the forests of the indigenous and tribal territories of Latin America as well as the indigenous and tribal peoples who protect them. These territories contain about a third of the continent's forests. That's 14% of the carbon stored in tropical forests around the world; These territories are also home to an enormous diversity of wild fauna and flora and play a key role in stabilizing the local and regional climate. Based on an analysis of the approaches that have proven effective in recent decades, a set of investments and policies is proposed for adoption by climate funders and government decision-makers in collaboration with indigenous and tribal peoples. These measures are grouped into five main categories: i) strengthening of collective territorial rights; ii) compensate indigenous and tribal communities for the environmental services they provide; iii) facilitate community forest management; iv) revitalize traditional cultures and knowledge; and v) strengthen territorial governance and indigenous and tribal organizations. Preliminary analysis suggests that these investments could significantly reduce expected carbon emissions at a low cost, in addition to offering many other environmental and social benefits.

Medical Management of the Pregnant Patient Karen Rosene-Montella 2014-11-06 This protocol-based book uses algorithms to discuss preconception care, care during pregnancy, labor and delivery, and the link between postpartum and ongoing primary care. The need for an educated provider community to care for pregnant patients is enormous, and *Medical Management of the Pregnant Patient* provides a practical handbook that addresses all aspects of this topic. A brief overview of physiology, its impact on pregnancy and diagnostics, and treatment recommendations are included. Each section covers both diseases that may exist independent of pregnancy and diseases unique to pregnancy. Additionally, symptom-based complaints are incorporated into each section and cross-referenced appropriately. Internal medicine physicians, obstetricians, family practitioners and gynecologists alike will benefit from the practical clinical guidelines presented in this book.

WHO Recommendations on Intrapartum Care for a Positive Childbirth Experience World Health Organization 2018-06-25 This up-to-date, comprehensive and consolidated guideline on essential intrapartum care brings together new and existing WHO recommendations that, when delivered as a package, will ensure good-quality and evidence-based care irrespective of the setting or level of health care. The recommendations presented in this guideline are neither country nor region specific and acknowledge the variations that exist globally as to the level of available health services within and between countries. The guideline highlights the importance of woman-centered care to optimize the experience of labor and childbirth for women and their babies through a holistic, human rights-based approach. It introduces a global model of intrapartum care, which takes into account the complexity and diverse nature of prevailing models of care and contemporary practice. The recommendations in this guideline are intended to inform the development of relevant national- and local-level health policies and clinical protocols. Therefore, the target audience includes national and local public health policy-makers, implementers and managers of maternal and child health programs, health care facility managers, nongovernmental organizations (NGOs), professional societies involved in the planning and management of maternal and child health services, health care professionals (including nurses, midwives, general medical practitioners and obstetricians) and academic staff involved in training health care professionals.

Lions of the North Benjamin R. Teitelbaum 2017 In September of 2010, the *Daily Mail Reporter* announced "Anti-immigration party formed from skinhead movement seizes balance of power in Sweden." A politics of skinhead protest, expressed through White Power Music and an explicitly nationalistic subgenre known as Viking Rock, has relied on its music to voice opposition to immigration and multiculturalism. Often labeled "neo-Nazis" or "right-wing extremists," these actors shook political establishments throughout Sweden, Denmark, and Norway during the 1980s and 1990s by rallying around white power music and skinhead subculture. Morerecently, however, these groups methodically revised their presentation in an effort to refashion themselves as upstanding, intelligent champions of love and human diversity,

and once again using music to do so. In *Lions of the North: Sounds of the New Nordic Radical Nationalism*, author Benjamin Teitelbaum explores this transformation of anti-immigrant, anti-liberal activism in the Nordic countries as it manifests in thought and sound. As his fieldwork in Sweden overlapped with Anders Behring Breivik's attacks in 2011, Teitelbaum observed the radical nationalist movement at a particularly sensitive moment. Offering a rare ethnographic glimpse into controversial and secretive political movements, *Lions of the North* investigates changes in the music nationalists make and patronize, reading their surprising new music styles as attempts to escape stereotypes and fashion a new image for themselves. Teitelbaum's work reveals organized opposition to immigration and multiculturalism in Scandinavia to be a scene in flux, populated by individuals with diverse understandings of themselves, their cause, and the significance of music. Ultimately, he uncovers the ways in which nationalists use music to frame themselves as agents of justice, an image that is helping to propel these actors to unprecedented success in societies often considered the most tolerant in the world. A timely and powerful work of interdisciplinary ethnomusicology, *Lions of the North* will appeal to a wide audience, from scholars in the humanities to those in political science.

Hypertension in Pregnancy Alexander Heazell 2010-08-26 Hypertensive disorders are among the most common medical complications of pregnancy, with an incidence of approximately 6-10%. This spectrum of conditions includes essential hypertension, pre-eclampsia and HELLP syndrome. For patients with pre-existing hypertension, management ideally commences prior to conception, and continues through pregnancy to the postnatal period. This book provides information on the evidence-based management of women with hypertension throughout pregnancy, supported by important background information on the etiology, risk-factors and pathophysiology of these disorders. Illustrated with accompanying algorithms, tables and lists for quick reference on diagnostic criteria, drugs and side-effects, this book will help clinicians rapidly gain access to the information they need to care for these patients. This will be of interest to all grades of obstetric trainees as well as specialists, obstetric anesthetists and anesthetic trainees, midwives and maternal-fetal physicians.

Antistatic Sprays National Aeronautics and Space Administration 2018-10-25 Antistatic sprays from several different manufacturers are examined. The sprays are examined for contamination potential (i.e., outgassing and nonvolatile residue), corrosiveness on an aluminum mirror surface, and electrostatic effectiveness. In addition, the chemical composition of the antistatic sprays is determined by infrared spectrophotometry, mass spectrometry, and ultraviolet spectrophotometry. The results show that 12 of the 17 antistatic sprays examined have a low contamination potential. Of these sprays, 7 are also noncorrosive to an aluminum surface. And of these, only 2 demonstrate good electrostatic properties with respect to reducing voltage accumulation; these sprays did not show a fast voltage dissipation rate however. The results indicate that antistatic sprays can be used on a limited basis where contamination potential, corrosiveness, and electrostatic effectiveness is not critical. Each application is different and proper evaluation of the situation is necessary. Information on some of the properties of some antistatic sprays is presented in this document to aid in the evaluation process. Ming, James E. Goddard Space Flight Center

Marsden's Book of Movement Disorders Ivan Donaldson 2012-03-29 This book represents the final work of the late Professor C. David Marsden, who was the most influential figure in the field of movement disorders, in terms of his

contributions to both research and clinical practice, in the modern era. It was conceived and written by David Marsden and his colleague at the Institute of Neurology, Prof. Ivan Donaldson. It was their intention that this would be the most comprehensive book on movement disorders and also that it would serve as the 'clinical Bible' for the management of these conditions. It provides a masterly survey of the entire topic, which has been made possible only by vast laboratory and bedside experience. Marsden's *Book of Movement Disorders* covers the full breadth of movement disorders, from the underlying anatomy and understanding of basal ganglia function to the diagnosis and management of specific movement disorders, including the more common conditions such as Parkinson's Disease through to rare, and very rare conditions such as Niemann-Pick disease. Chapters follow a structured format with historical overviews, definitions, clinical features, differential diagnosis, investigations and treatment covered in a structured way. It is extensively illustrated with many original photographs and diagrams of historical significance. Among these illustrations are still images of some original film clips of some of Dr. Marsden's patients published here for the first time. Comprehensively referenced and updated by experts from the Institute of Neurology at Queen Square, this book is a valuable reference for, not just movement disorder specialists and researchers, but also for clinicians who care for patients with movement disorders.

Tivoli Integration Scenarios Redbooks Tivoli Integration Scenarios Team IBM 2011-01-11 This IBM® Redbooks® publication provides a broad view of how Tivoli® system management products work together in several common scenarios. You must achieve seamless integration for operations personnel to work with the solution. This integration is necessary to ensure that the

product can be used easily by the users. Product integration contains multiple dimensions, such as security, navigation, data and task integrations. Within the context of the scenarios in this book, you see examples of these integrations. The scenarios implemented in this book are largely based on the input from the integration team, and several clients using IBM products. We based these scenarios on common real-life examples that IT operations often have to deal with. Of course, these scenarios are only a small subset of the possible integration scenarios that can be accomplished by the Tivoli products, but they were chosen to be representative of the integration possibilities using the Tivoli products. We discuss these implementations and benefits that are realized by these integrations, and also provide sample scenarios of how these integrations work. This book is a reference guide for IT architects and IT specialists working on integrating Tivoli products in real-life environments.

The Land Within Pedro García Hierro 2005 By describing the fabric of relationships indigenous peoples weave with their environment, *The Land Within* attempts to define a more precise notion of indigenous territoriality. A large part of the work of titling the South American indigenous territories may now be completed but this book aims to demonstrate that, in addition to management, these territories involve many other complex aspects that must not be overlooked if the risk of losing these areas to settlers or extraction companies is to be avoided. Alexandre Surralls holds a doctorate in anthropology from the School for Higher Studies in Social Sciences and is a researcher on the staff of the National Centre for Scientific Research. Pedro Garca Hierro is a lawyer from Madrid Complutense University and the Pontifical Catholic University of Peru. He has worked with various indigenous organizations, on issues related to the identification and development of collective rights and the promotion of intercultural democratic reforms.

Water, Cultural Diversity, and Global Environmental Change Barbara Rose Johnston 2011-12-07 Co-published with UNESCO A product of the UNESCO-IHP project on Water and Cultural Diversity, this book represents an effort to examine the complex role water plays as a force in sustaining, maintaining, and threatening the viability of culturally diverse peoples. It is argued that water is a fundamental human need, a human right, and a core sustaining element in biodiversity and cultural diversity. The core concepts utilized in this book draw upon a larger trend in sustainability science, a recognition of

~~Postjare Ethnography~~ analytical potential in utilizing a coupled biological and social systems analysis, as the functioning viability of nature is both sustained and threatened by humans.

Tobias Rees 2018-11-23 For most of the twentieth century, anthropologists understood themselves as ethnographers. The art of anthropology was the fieldwork-based description of faraway others—of how social structures secretly organized the living-together of a given society, of how a people had endowed the world surrounding them with cultural meaning. While the poetics and politics of anthropology have changed dramatically over the course of a century, the basic equation of anthropology with ethnography—as well as the definition of the human as a social and cultural being—has remained so evident that the possibility of questioning it occurred to hardly anyone. In *After Ethnos* Tobias Rees endeavors to decouple anthropology from ethnography—and the human from society and culture—and explores the manifold possibilities of practicing a question-based rather than an answer-based anthropology that emanates from this decoupling. What emerges from Rees's provocations is a new understanding of anthropology as a philosophically and poetically inclined, fieldwork-based investigation of what it could mean to be human when the established concepts of the human on which anthropology has been built increasingly fail us.

Climate and Conservation Jodi A. Hilty 2012-05-29 *Climate and Conservation* presents case studies from around the world of leading-edge projects focused on climate change adaptation-regional-scale endeavors where scientists, managers, and practitioners are working to protect biodiversity by protecting landscapes and seascapes in response to threats posed by climate change. The book begins with an introductory section that frames the issues and takes a systematic look at planning for climate change adaptation. The nineteen chapters that follow examine particular case studies in every part of the world, including landscapes and seascapes from equatorial, temperate, montane, polar, and marine and freshwater regions. Projects profiled range from North American grasslands to boreal forests to coral reefs to Alpine freshwater environments. Chapter authors have extensive experience in their respective regions and are actively engaged in working on climate-related issues. The result is a collection of geographical case studies that allows for effective cross-comparison while at the same time recognizing the uniqueness of each situation and locale. *Climate and Conservation* offers readers tangible, place-based examples of projects designed to protect large landscapes as a means of conserving biodiversity in the face of the looming ~~the United Nations~~ climate change. It informs readers of how a diverse set of ~~REDD Forest Governance and Reporting Guidelines~~ climate change at a scale that matches the problem, and is an essential contribution for anyone involved with large-scale biodiversity conservation.
