Protecting Mobile Money against Financial Crimes Pierre-Laurent Chatain 2011-02-24 Mobile Money is a booming industry in an increasing number of countries worldwide. The project results from increased demand for guidance and technical assistance from governments after the 2008 publication of an exploratory paper, Integrity in Mobile Phone Financial Services, which discussed mobile money and the application of international anti-money laundering (AML) and combating the financing of terrorism (CFT) standards. For most, how to craft a regulatory regime that expands access to financial services to the poor through the development of mobile phone financial services, but compliant with AML/CFT standards remains elusive. Specific AML/CFT regulations related to mobile money have not been issued in many jurisdictions, mainly due to the lack of awareness of the risks these services can pose if the right controls are not in place. Because the international standards for AML/CFT, the Financial Action Task Force's 40 + 9 Recommendations were designed and issued well before mobile money technology and business models became prevalent, even developed countries have begun to face challenges with their regulation. The project team aims to provide practical guidance to jurisdictions and the Industry on how to draft regulations and internal guidelines that allow them to comply with AML/CFT standards with enough flexibility for mobile money to thrive. Specifically, the paper (1) takes stock of new AML/CFT regulations and practices relevant to Mobile money, (2) design guidelines for drafting AML/CFT regulations that cover mobile money and (3) propose examples of best practices for the Industry to include AML/CFT in their own business model.

Preventing Money Laundering and Terrorist Financing 2009 "Money laundering and terrorist financing are serious crimes that affect not only those persons directly involved, but the economy as a whole.

According to international standards, every bank has the obligation to know its customers and to report suspicious transactions. Although these obligations sound straightforward, they have proved challenging to implement. What information precisely has to be gathered? How should it be recorded? If and when does one have to file a suspicious transaction report? It is here that a supervisor can play a crucial role in helping supervised institutions; first, in understanding the full extent of the obligations of Customer Due Diligence and Suspicious Transaction Reports (STR) and, second, in ensuring that those obligations are not just words on paper but are applied in practice. Effective supervision is key to the success of a country's AML/CFT system. In this regard, field work in both developed and developing countries has shown an overall low compliance in the area of supervision of banks and other financial institutions; supervisory compliance is indeed generally lower than the average level of compliance with all Financial Action Task Force recommendations. As a result, by providing examples of good practices, this book aims to help countries better conform to international standards. In this regard, this handbook is specifically designed for bank supervisors.

Politically Exposed Persons Theodore S. Greenberg 2010-04-19 In recent years, revelations of grand corruption and the plunder of state assets have led to greater scrutiny of financial relationships with politically exposed persons (PEPs) senior government officials and their family members and close associates. Notwithstanding the efforts by many financial institutions and regulatory authorities to prevent corrupt PEPs from entering and using the financial system to launder the proceeds of corruption, there has been an overall failure in the effective implementation of international standards on PEPs. Implementation of

an effective PEP regime is a critical component in the prevention and detection of transfers of proceeds of crime and, therefore, ultimately in the process of recovering them. 'Politically Exposed Persons: Preventive Measures for the Banking Sector' is designed to help banks and regulatory authorities address the risks posed by PEPs and prevent corrupt PEPs from using domestic and international financial systems to launder the proceeds of corruption. The book provides recommendations and good practices aimed at improving compliance with international standards and increasing supervisory effectiveness. It is an important tool for individuals, governments, financial and private sector companies, and international organizations involved in developing and implementing standards aimed at fighting corruption and money laundering, and trying to recover stolen assets and the proceeds of corruption.

Law enforcement agencies access, use, and develop good quality financial intelligence. Financial sector supervisors have been using a risk-based approach to varying degrees, but their supervisory tools could be improved.

Taxing Crime Jean-Pierre Brun 2022-07-21 *Taxing Crime: A Whole-of-Government Approach to Fighting Corruption, Money Laundering, and Tax Crimes* examines how tax audits and investigations can lead to uncovering white-collar crime and how investigations of corruption can, in turn, lead to prosecutions of tax evasion or recovery of unpaid taxes. Prepared jointly by the World Bank and the United Nations Office on Drugs and Crime (UNODC) Stolen Asset Recovery Initiative (StAR) and the Global Tax Policy Center at the Institute for Austrian and International Tax Law, Vienna University of Economics and Business, this report offers analysis, case studies, examples of legal and operational frameworks, and recommendations that policy makers can use to enhance cooperation between tax authorities and law enforcement agencies at the national and international levels. This study is designed to serve as a reference and source of advocacy for policy makers, but it may be useful to other practitioners as well, including law enforcement officials, investigating magistrates, and prosecutors. Specifically, chapters present strategic considerations for establishing communication channels between tax and criminal investigative agencies; suggestions for combining tax and financial crime prosecution as part of an interagency asset recovery strategy; and approaches to developing interagency information exchange at the regional and international levels. It concludes with recommendations on ways to enhance the roles of both the tax authorities in combating money laundering and corruption and of the law enforcement authorities in recovering the proceeds of tax crimes. • Chapter 1 provides an introduction. • Chapter 2 presents strategic considerations for establishing information exchange channels between tax and criminal investigative agencies. • Chapter 3 explains how to combine tax and financial crime prosecution as part of an interagency asset recovery strategy. • Chapter 4 discusses approaches to developing interagency information exchange at the regional and international levels. • Chapter 5 provides recommendations for future efforts to enhance the role of tax authorities in supporting efforts to combat money laundering and corruption, and the role of law enforcement authorities in the recovery of proceeds of tax crimes. • The appendix contains case studies that illustrate effective interagency cooperation, including at the international level.

Financial Intelligence Units 2004 Over the past decade and beyond, the need for a modern anti-money-laundering strategy has become widely accepted internationally. Depriving criminal elements of the proceeds of their crimes has increasingly been seen as an important tool to combat drug trafficking and, more recently, as a critical element in fighting organized crime, corruption, and the financing of terrorism, and maintaining the integrity of financial markets. The first few financial intelligence units (FIUs) were established in the early 1990s in response to the need for countries to have a central agency to receive, analyze, and disseminate financial information to combat money laundering. Over the ensuing period, the number of FIUs has continued to increase, reaching 84 in 2003. This handbook responds to the need for information on FIUs. It provides references to the appropriate Financial Action Task Force (FATF) standards wherever appropriate.

Anti-Money Laundering in a Nutshell Kevin Sullivan 2015-07-14 Anti-Money Laundering in a Nutshell is a concise, accessible, and practical guide to compliance with anti-money laundering law for financial professionals, corporate investigators, business managers, and all personnel of financial institutions who are required, under penalty of hefty fines, to get anti-money laundering training. Money laundering is endemic. As much as 5 percent of global GDP (\$3.6 trillion) is laundered by criminals each year. It's no wonder that every financial institution in the United States—including banks, credit card companies, insurers, securities brokerages, private funds, and money service businesses—must comply with complex examination, training, and reporting requirements mandated by a welter of federal anti-money laundering (AML) laws. Ignorance of crime is no excuse before the law. Financial institutions and businesses that unknowingly serve as conduits for money laundering are no less liable to prosecution and fines than those that condone or abet it. In *Anti-Money Laundering in a Nutshell: Awareness and Compliance for Financial Personnel and Business Managers*, Kevin Sullivan draws on a distinguished career as an AML agent and consultant to teach personnel in financial institutions what money laundering is, who does it, how they do it, how to prevent it, how to detect it, and how to report it in compliance with federal law. He traces the dynamic interplay among employees, regulatory examiners, compliance officers, fraud and forensic accountants and technologists, criminal investigators, and prosecutors in following up on reports, catching launderers, and protecting the integrity and reputations of financial institutions and businesses. In particular, corporate investigators will gain rich insights winnowed from the author's experiences as a New York State and federal investigator.
