McDonnell F2H-3/4 Steve Ginter 2012-01 The F2H-3/4 Banshee ("Big Banjo") was a direct outgrowth of the F2H-1 and F2H-2 series of Korean war fighter and recon jets (see Naval Fighters #73 Early Banshees). It became the US Navy's first single seat all-weather carrier interceptor. To satisfy its mission the F2H-3/4 was required to have a significant increase in range. To accomplish this the internal fuel capacity was more than doubled by stretching the fuselage by 8 feet 1.6 inches. This gave the F2H-3/4 a combat range with tip tanks of 1,490 nautical miles. In addition to the fuselage extension, the tail surfaces of the F2H-3/4 were also redesigned. The horizontal tail was moved down to the rear of the fuselage tail cone and given a 10 degree

dihedral. To accommodate the enlarged radar unit the four nose-mounted cannons were moved aft along the lower fuselage sides. The difference in the F2H-3 and F2H-4 was in the radar. The F2H-3 used the Westinghouse APQ-41 with a 28" dish and the F2H-4 was equipped with the Hughes APG-37 radar. The F2H-4 further differs from the -3 by having up-rated J34-WE-38 engines. The larger engines allowed for a service ceiling of 56,000 ft. The aircraft also had increased wing stations and was capable of carrying Sidewinder air-to-air missiles. The aircraft were active with the Navy and Marines from 1952 through 1959. It was operated by 31 active Navy and Marine squadrons which histories appear in the book along with squadron insignia. The book also includes a chapter on Royal Canadian

F2H-3s.

The Roman City and its Periphery Penelope Goodman 2006-11-07 The first and only monograph available on the subject, *The Roman City and its Periphery* offers a full and detailed treatment of the little-investigated aspect of Roman urbanism – the phenomenon of suburban development. Presenting archaeological and literary evidence alongside sixty-three plans of cities, building plans, and photographs, Penelope Goodman examines how and why Roman suburbs grew up outside Roman cities, what was distinctive about the nature of suburban development, and what contributions buildings and activities in the suburbs might make to the

character and function of the city as a whole.

With full bibliography and annotations throughout, this will not only provide a coherent treatment of an essential theme for students of Roman urbanism, but archaeologists, urban planners and geographers also, will have an excellent comparative tool in the study of modern urbanism.

Weaponomics: the global market for assault rifles

Phillip Killicoat 2007 Abstract: This paper introduces the first effort to quantitatively document the small arms market by collating field reports and journalist accounts to produce a cross-country time-series price index of Kalashnikov assault rifles. A model of the small arms market is developed and empirically estimated to identify the key determinants of assault rifle prices. Variables which proxy the effective height of trade barriers for illicit trade are consistently significant in determining weapon price variation. When controlling for other factors, the collapse of the Soviet Union does not have as large an impact on weapon prices as is generally believed.

From Jailer to Jailed Bernard B. Kerik 2015-03-31

The controversial New York City police commissioner and New York Times bestselling author of *The Lost Son* shares the story of his fall from grace and the effects of his incarceration on his views of the American justice system. Bernard Kerik was New York City's police commissioner during the 9/11 attacks, and became an American hero as he led the NYPD through rescue and recovery efforts of the World Trade Center. His résumé as a public servant is long and storied, and includes receiving a Medal of Honor. In 2004, Kerik was nominated by George W. Bush to head the Department of Homeland Security. Now, he is a former Federal Prison Inmate known as #84888-054. Convicted of tax fraud and false statements in 2007, Kerik was sentenced to four years in federal prison. Now, for the first time, he talks candidly about what it was like on the inside: the torture of solitary confinement, the abuse of power, the mental and physical torment of being locked up in a cage, the powerlessness. With newfound perspective, Kerik makes a plea for change and illuminates why our punishment

system doesn't always fit the crime. In this extraordinary memoir, Kerik reveals his unprecedented view of the American penal system from both sides: as the jailer and the jailed. With astonishing candor, bravery, and insider's intelligence, Bernard Kerik shares his fall from grace to incarceration, and turns it into a genuine and uniquely insightful argument for criminal justice reform.

U.s. Ecm Aircraft in Action Ken Neubeck

2017-01-16 The purpose of Electronic countermeasures (ECM) is to jam, spoof, trick or otherwise fool an enemy about the location or capabilities of armed combat units. While the United States employs ECM on the land, air and sea, modern military aircraft are the primary platform in the ECM battle because they can scan a larger patch of earth. This book briefly explains the history and development of various ECM techniques with particular emphasis on U.S. Navy, Air Force and Marine aircraft that have taken electronic countermeasures into battle from the 1950s through present. Specific aircraft included in the book are ECM variants from the 1950s, Vietnam, the Cold War, Operation Desert Storm, Operation Deliberate Force (Yugoslavia), and modern aircraft including the Navy's EA-18 Growler, which is capable of jamming frequencies and eliminating surface-to-air radar sites at speeds of Mach 1.8.

The G3 Battle Rifle Leroy Thompson 2019-05-30

During the Cold War, the G3 was one of the world's pre-eminent battle rifles. Developed in France and Spain after 1945, the rifle was produced by the German arms manufacturer Heckler & Koch. Adopted by more than 40 countries and produced on licence by many more, it was widely employed during colonial wars in Africa, insurgencies in Latin America and conflicts in the Middle East, but perhaps its widest use was in the Iran–Iraq War. Variants of the G3 have also seen substantial usage among Special Forces including Britain's Special Boat Service and the US Navy SEALs. Semi-automatic versions, especially the HK91 and HK93, remain popular in the United States, and the G3-derived HK11 and HK21 family of light machine guns have also been widely adopted by military and

law-enforcement units across the world. Fully illustrated with specially commissioned artwork, this study examines one of the iconic weapons of the Cold War era.

Leading Lean Software Development Mary Poppendieck 2009-10-21 Building on their breakthrough bestsellers Lean Software Development and Implementing Lean Software Development, Mary and Tom Poppendieck's latest book shows software leaders and team members exactly how to drive high-value change throughout a software organization—and make it stick. They go far beyond generic implementation guidelines, demonstrating exactly how to make lean work in real projects, environments, and companies. The Poppendiecks organize this book around the crucial concept of frames, the unspoken mental constructs that shape our perspectives and control our behavior in ways we rarely notice. For software leaders and team members, some frames lead to long-term failure, while others offer a strong foundation for success. Drawing on decades of experience, the authors present twenty-four frames that offer a coherent, complete framework for leading lean software development. You'll discover powerful new ways to act as competency leader, product champion, improvement mentor, front-line leader, and even visionary. Systems thinking: focusing on customers, bringing predictability to demand, and

revamping policies that cause inefficiency
Technical excellence: implementing low-dependency architectures, TDD, and evolutionary development processes, and promoting deeper developer expertise
Reliable delivery: managing your biggest risks more effectively, and optimizing both workflow and schedules
Relentless improvement: seeing problems, solving problems, sharing the knowledge
Great people: finding and growing professionals with purpose, passion, persistence, and pride
Aligned leaders: getting your entire leadership team on the same page
From the world's number one experts in Lean software development, *Leading Lean Software Development* will be indispensable to everyone who wants to transform the promise of lean into reality—in enterprise IT and software companies alike.

AK47: The Story of the People's Gun Michael

Hodges 2008-03-20 In the sixty years since General Kalashnikov created the AK's distinctive silhouette, the gun has been at the centre of conflicts across the Middle East, Africa and Latin America. The weapon that made him a 'Hero of the Soviet Union' has also appeared on t-shirts and vodka bottles, featured in videos and song lyrics and been re-fashioned in crystal - a gift from Putin to George W. Bush. Power, politics and passion combine in the story of a weapon that has shaped the modern world. Using

testimonies of people who have experienced the gun at first-hand - including a Sudanese child soldier, a Vietcong veteran and a Yorkshire teenager - Michael Hodges provides a compelling account of how the AK47 became an icon that ranks alongside Coca-Cola as one of the most recognisable brands in the world.

The Great Suppression Zachary Roth 2016-08-02
A New York Times Book Review Editor's Choice
Finalist for the J. Anthony Lukas Book Prize
In the wake of Donald Trump's victory in the 2016 presidential election, a deeply reported look inside the conservative movement working to undermine American democracy. Donald Trump is the second Republican this century to triumph in the Electoral College without winning the popular vote. As Zachary Roth reveals in *The Great Suppression*, this is no coincidence. Over the last decade, Republicans have been rigging the game in their favor. Twenty-two states have passed restrictions on voting. Ruthless gerrymandering has given the GOP a long-term grip on Congress. Meanwhile, the Supreme Court has eviscerated campaign finance laws, boosting candidates backed by big money. It would be worrying enough if these were just schemes for partisan advantage. But the reality is even more disturbing: a growing number of Republicans distrust the very idea of democracy—and they're doing everything they can to limit it. In *The Great Suppression*, Roth unearths the deep historical

roots of this anti-egalitarian worldview, and introduces us to its modern-day proponents: The GOP officials pushing to make it harder to cast a ballot; the lawyers looking to scrap all limits on money in politics; the libertarian scholars reclaiming judicial activism to roll back the New Deal; and the corporate lobbyists working to ban local action on everything from the minimum wage to the environment. And he travels from Rust Belt cities to southern towns to show us how these efforts are hurting the most vulnerable Americans and preventing progress on pressing issues. A sharp, searing polemic in the tradition of Rachel Maddow and Matt Taibbi, *The Great Suppression* is an urgent wake-up call about a threat to our most cherished values, and a rousing argument for why we need democracy now more than ever.

[F-22 Raptor in Action](#) Lou Drendel 2017-02-13
The single-seat, twin-engine Lockheed Martin/Boeing F-22 Raptor is the world's first operational fifth-generation fighter. 'Fifth-Generation' denotes a new plateau in fighter design, surpassing the F-15 and Mig-29 capabilities. This volume traces the history of the Raptor and describes in detail why it is likely to be the world's best fighter for years to come. While the Raptor was designed for air superiority, it also embodies ground attack, electronic warfare, and signals intelligence features. After years in planning and development, the U.S. Air

Force announced plans to purchase more than 600 F-22 Raptors in 1991. Cutbacks in 1993 reduced the number to 442. With the onset of the Obama Administration, Raptor production was capped at 187 units. As challenges to U.S. global leadership mount, however, the Raptor's capabilities will face increasing demand.

Achtung-Panzer! Heinz Guderian 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.
