[Moral Tribes](#) Joshua Greene 2014-01-02 A ground-breaking and ambitious book that promotes a new understanding of morality, one that will help us to solve society's biggest problems. Our brains were designed for tribal life, for getting along with a select group of others (Us), and for fighting off everyone else (Them). But modern life has thrust the world's tribes into a shared space,

creating conflicts of interest and clashes of values, along with unprecedented opportunities. As the world shrinks, the moral lines that divide us become more salient and more puzzling. We fight over everything from tax codes to gay marriage to global warming, and we wonder where, if at all, we can find our common ground. A grand synthesis of neuroscience, psychology, and philosophy, *Moral Tribes* reveals the underlying causes of modern conflict and lights a way forward. Our emotions make us social animals, turning Me into Us. But they also make us tribal animals, turning Us against Them. Our tribal emotions make us fight, sometimes with bombs, sometimes with words, and often with life-and-death stakes. Drawing inspiration from moral philosophy and cutting-edge science, *Moral Tribes* shows when we should trust our instincts, when we should reason, and how the right kind of reasoning can move us forward. Joshua Greene is the director of Harvard University's Moral Cognition Lab, a pioneering scientist, a philosopher, and an acclaimed teacher. The great challenge of *Moral Tribes* is this: How can we get along with Them when what they want feels so wrong? Finally, Greene offers a surprisingly

simple set of maxims for navigating the modern moral terrain, a practical road map for solving problems and living better lives. *Realities and Relationships* Kenneth J. Gergen 2009-06-01
Lila Robert Pirsig 2013-11-06 In this bestselling new book, his first in seventeen years, Robert M. Pirsig, author of *Zen and the Art of Motorcycle Maintenance*, takes us on a poignant and passionate journey as mysterious and compelling as his first life-changing work. Instead of a motorcycle, a sailboat carries his philosopher-narrator Phaedrus down the Hudson River as winter closes in. Along the way he picks up a most unlikely traveling companion: a woman named Lila who in her desperate sexuality, hostility, and oncoming madness threatens to disrupt his life. In *Lila* Robert M. Pirsig has crafted a unique work of adventure and ideas that examines the essential issues of the nineties as his previous classic did the seventies.

Ethics and Literary Practice Adam Zachary Newton 2021-09-09 This volume draws together a diverse array of scholars from across the humanities to formulate and address the question of “ethics and literary practice” for a new decade. In taking up a conjunction whose terms remain productively open to question, fifteen essays survey a range of approaches and topics including genre and disciplinary rhetoric, emergence theory and literary signification, the ethics of alterity, of attention, and of aesthetics, the decolonial and the paracritical, neorealism and contingency, analogy and affect, scripture and national literature. From Seamus Heaney to Hannah Arendt, Teresa Brennan to Stanley Cavell, Ronit Matalon to Édouard Glissant, Uwe Timm to Katherena Vermette, *Notes for Echo Lake to the Gospel of St. Matthew*, these contributions demonstrate how broadly and fruitfully ramifying its organizing inquiry can be. Bringing such multifarious perspectives to the topic feels only more urgent as language, meaning, and expression enter the crucible of a “post-truth” era.

Reading Patristic Texts on Social Ethics Johan Leemans 2011-04-01 Can writings of the church fathers related to the field

of social ethics be of value to contemporary discussions on the topic? In addressing this question, the authors of this book discuss the exciting challenges that scholars of both early Christianity and contemporary Catholic social thought face regarding the interaction of historical sources and present issues.

Scripture: A Very Theological Proposal Angus Paddison 2009-10-10 To identify the biblical texts as 'Scripture' is to make a series of specific claims about this text: that it is drawn into the activity of the triune God of Israel; that its ultimate destination is the worshipping church; and that it has a ministry in shaping Christian thinking and acting. *Scripture: A Very Theological Proposal* advances that the resources for reading Scripture, understanding its claims, and acting upon them will be found by looking to the church's life and doctrines. Reading Scripture with a host of theologians, Paddison proposes a hermeneutic appropriate to reading Scripture both as divine address and the book of the church. The book positions itself by resisting accounts in which Scripture's relationship to God and its life within the church are understood competitively, as if the more we attend to one the less we are attending to the other. Chapters further explore a doctrine of Scripture and the relationship of ethics, doctrine, and preaching to Scripture. A final chapter asks, can, or should, Scripture be read in the university?

The Company We Keep Wayne C. Booth 1988 In *The Company We Keep*, Wayne C. Booth argues for the relocation of ethics to the center of our engagement with literature. But the questions he asks are not confined to morality. Returning ethics to its root sense, Booth proposes that the ethical critic will be interested in any effect on the ethos, the total character or quality of tellers and listeners. Ethical criticism will risk talking about the quality of this

particular encounter with this particular work. Yet it will give up the old hope for definitive judgments of "good" work and "bad." Rather it will be a conversation about many kinds of personal and social goods that fictions can serve or destroy. While not ignoring the consequences for conduct of engaging with powerful stories, it will attend to that more immediate topic, What happens to us as we read? Who am I, during the hours of reading or listening? What is the quality of the life I lead in the company of these would-be friends? Through a wide variety of periods and genres and scores of particular works, Booth pursues various metaphors for such engagements: "friendship with books," "the exchange of gifts," "the colonizing of worlds," "the constitution of commonwealths." He concludes with extended explorations of the ethical powers and potential dangers of works by Rabelais, D. H. Lawrence, Jane Austen, and Mark Twain.

Machiavelli's Ethics Erica Benner 2009 Erica Benner challenges the received wisdom, arguing that Machiavelli's aim was to show his readers how to see through deceptive political appearances & rhetoric, & that he both favoured the rule of law & supported a coherent theory of justice. He did not defend the maxim that the ends justify the means.

A Thousand Small Sanities Adam Gopnik 2019-05-14 A stirring defense of liberalism against the dogmatisms of our time from an award-winning and New York Times bestselling author. Not since the early twentieth century has liberalism, and liberals, been under such relentless attack, from both right and left. The crisis of democracy in our era has produced a crisis of faith in liberal institutions and, even worse, in liberal thought. A Thousand Small Sanities is a manifesto rooted in the lives of people who invented and extended the liberal tradition. Taking us from Montaigne to Mill, and from Middlemarch to the civil rights movement, Adam Gopnik argues that liberalism is not a form of centrism, nor simply another word for free markets, nor merely a term denoting a set of rights. It is something far more ambitious: the search for radical change by humane measures. Gopnik shows us why liberalism is one of the great moral adventures in human history -- and why, in an age of autocracy, our lives may depend on its continuation. *Beauty and the Yeast* Dwight Furrow 2020 Previous work on the philosophy of wine has shown wine to be an important source of aesthetic experiences. "Beauty and the Yeast" takes this argument in surprising new directions. It analyzes wine as an expressive, living organism that challenges our assumptions about creativity, beauty, good taste, and objectivity, and explains why the changing landscape of wine requires that we rethink the role of established wine traditions. The book offers unique philosophical

insights into the nature of wine as an art form. It addresses issues in wine aesthetics regarding the nature of wine language and wine criticism and develops a new and distinctive theory of objectivity in aesthetic judgments that relies on dispositional realism as its theoretical framework. Finally, "Beauty and the Yeast" explores a novel approach to wine tasting that reveals our emotional attachment to wine. The book appeals to philosophers and academics interested in aesthetics but is written in an accessible style that will include in its audience wine enthusiasts and people in the wine industry involved in making and evaluating wine.-- Publisher.

Literacy and Education Uta Papen 2015-07-16 Literacy is a perennial 'hot topic' in Britain and other English-speaking countries. Concerns about falling standards and a 'literacy crisis' are frequently raised. In response, governments initiate new policies and teaching guidelines. This book addresses the current policies, practices and media debates in England, the US, Scotland and Australia. Literacy and Education examines: How literacy is taught to children in primary schools; The place of phonics in current policies and the arguments made for and against it; How teachers deliver phonics lessons and how children engage with the method; The range of literacy practices children engage with throughout the school day and how they contribute to literacy learning; The contributions a social and critical perspective on literacy can make to current debates regarding teaching strategies; A wide range of research conducted in the UK, North America, Australia and other countries. Bringing together policy, practice and public debate and drawing on the author's extensive research in a primary school, this essential new textbook provides questions and tasks for readers to engage with. Literacy and Education is ideal for advanced undergraduate and postgraduate students of literacy and education and students on PGCE courses. It will also be of interest to researchers and teachers.

Against Theory Dwight Furrow 1995 Against Theory's is a

remarkable synthesis of both the continental and analytical philosophical traditions around the subject of morality. Its singularity lies in its analysis of the implications postmodernism has had on ethics.

Bearing Witness Courtney S. Campbell 2019-09-09 In *Bearing Witness*, Courtney S. Campbell draws on his experience as a teacher, scholar, and a bioethics consultant to propose an innovative interpretation of the significance of religious values and traditions for bioethics and health care. The book offers a distinctive exposition of a covenantal ethic of gift-response-responsibility-transformation that informs a quest for meaning in the profound choices that patients, families, and professionals face in creating, sustaining, and ending life. Campbell's account of "bearing witness" offers new understandings of formative ethical concepts, situates medicine as a calling and vocation rooted in concepts of healing, affirms professional commitments of presence for suffering and dying persons, and presents a prophetic critique of medical-assisted death. This book offers compelling critiques of secular models of medical professionalism and of individualistic assumptions that distort the physician-patient relationship. This innovative interpretation bears witness to the relevance of religious perspectives on an array of bioethical issues from new reproductive technologies to genetics to debates over end-of-life ethics and bears witness against the oddities of a market-oriented and consumerist vision of health care that is especially salient for an era of health-care reform.

Social Ethics Thomas A. Mappes 1992 In its seventh edition, "Social Ethics: Morality and Social Policy" continues to provide material that will encourage reflective and critical examination of key contemporary moral problems. With additional readings and a new organization that groups related chapters together under four categories, this edition enhances the teachability that was the most salient characteristic of previous editions. The text maintains its ability to bring the central issues into clear focus, while allowing

supporting arguments for widely diverse positions to be presented by those who embrace them.

The Hauerwas Reader Stanley Hauerwas 2001-07-02 Stanley Hauerwas is one of the most widely read and oft-cited theologians writing today. A prolific lecturer and author, he has been at the forefront of key developments in contemporary theology, ranging from narrative theology to the “recovery of virtue.” Yet despite his prominence and the esteem reserved for his thought, his work has never before been collected in a single volume that provides a sense of the totality of his vision. The editors of The Hauerwas Reader, therefore, have compiled and edited a volume that represents all the different periods and phases of Hauerwas’s work. Highlighting both his constructive goals and penchant for polemic, the collection reflects the enormous variety of subjects he has engaged, the different genres in which he has written, and the diverse audiences he has addressed. It offers Hauerwas on ethics, virtue, medicine, and suffering; on euthanasia, abortion, and sexuality; and on war in relation to Catholic and Protestant thought. His essays on the role of religion in liberal democracies, the place of the family in capitalist societies, the inseparability of Christianity and Judaism, and on many other topics are included as well. Perhaps more than any other author writing on religious topics today, Hauerwas speaks across lines of religious traditions, appealing to Methodists, Jews, Anabaptists or Mennonites, Catholics, Episcopalians, and others.

Incarcerating the Crisis Jordan T. Camp 2016-04-18 The United States currently has the largest prison population on the planet. Over the last four decades, structural unemployment, concentrated urban poverty, and mass homelessness have also become permanent features of the political economy. These developments are without historical precedent, but not without historical explanation. In this searing critique, Jordan T. Camp

traces the rise of the neoliberal carceral state through a series of turning points in U.S. history including the Watts insurrection in 1965, the Detroit rebellion in 1967, the Attica uprising in 1971, the Los Angeles revolt in 1992, and events in post-Katrina New Orleans in 2005. *Incarcerating the Crisis* argues that these dramatic events coincided with the emergence of neoliberal capitalism and the state’s attempts to crush radical social movements. Through an examination of the poetic visions of social movements—including those by James Baldwin, Marvin Gaye, June Jordan, José Ramírez, and Sunni Patterson—it also suggests that alternative outcomes have been and continue to be possible.

The Financial Crisis Inquiry Report Financial Crisis Inquiry Commission 2011-05-01 The Financial Crisis Inquiry Report, published by the U.S. Government and the Financial Crisis Inquiry Commission in early 2011, is the official government report on the United States financial collapse and the review of major financial institutions that bankrupted and failed, or would have without help from the government. The commission and the report were implemented after Congress passed an act in 2009 to review and prevent fraudulent activity. The report details, among other things, the periods before, during, and after the crisis, what led up to it, and analyses of subprime mortgage lending, credit expansion and banking policies, the collapse of companies like Fannie Mae and Freddie Mac, and the federal bailouts of Lehman and AIG. It also discusses the aftermath of the fallout and our current state. This report should be of interest to anyone concerned about the financial situation in the U.S. and around the world. THE FINANCIAL CRISIS INQUIRY COMMISSION is an independent, bi-partisan, government-appointed panel of 10 people that was created to “examine the causes, domestic and global, of the current financial and economic crisis in the United States.” It was established as part of the Fraud Enforcement and Recovery Act of 2009. The commission consisted of private citizens with expertise in economics and finance, banking, housing, market regulation, and

consumer protection. They examined and reported on "the collapse of major financial institutions that failed or would have failed if not for exceptional assistance from the government." Reviving the Left Dwight Furrow 2009 With the historic election of Barack Obama as president and both houses of Congress now under Democratic control for the first time in over a decade, Democrats, left-leaning moderates, and those who crossed party lines have high expectations. The Obama win symbolizes a nation desperate for values that can replace the divisiveness, dishonesty, and confrontation of the Bush administration with an inclusive climate of concern for all citizens.

Social Theory and Practice 2004

A Short History of Atheism Gavin Hyman 2010-09-30 The last few years have seen a remarkable surge of popular interest in the topic of atheism. Books about atheism by writers like Richard Dawkins and Christopher Hitchens have figured prominently in

bestseller lists and have attracted widespread discussion in the media. The ubiquity of public debates about atheism, especially in conscious opposition to the perceived social threat posed by faith and religion, has been startling. However, as Gavin Hyman points out, despite their prevalence and popularity, what often characterises these debates is a lack of nuance and sophistication. They can be shrill, ignorant of the historical complexity of debates about belief, and tend to lapse into caricature. What is needed is a clear and well informed presentation of how atheistic ideas originated and developed, in order to illuminate their contemporary relevance and application. That task is what the author undertakes here. Exploring the rise of atheism as an explicit philosophical position (notably in the work of Denis Diderot), Hyman traces its development in the later ideas of Descartes, Locke and Berkeley. Drawing also on the work of contemporary scholars like Amos Funkenstein and Michael J Buckley, the author shows that, since in recent theology the concept of God which atheists negate is changing, the triumph of its advocates may not be quite as unequivocal as Hitchens and Dawkins would have us believe.

The Greening of Protestant Thought Robert Booth Fowler 2000-11-09 The Greening of Protestant Thought traces the increasing influence of environmentalism on American Protestantism since the first Earth Day, which took place in 1970. Robert Booth Fowler explores the extent to which ecological concerns permeate Protestant thought and examines contemporary controversies within and between mainline and

fundamentalist Protestantism over the Bible's teachings about the environment. Fowler explores the historical roots of environmentalism in Protestant thought, including debates over God's relationship to nature and the significance of the current environmental crisis for the history of Christianity. Although he argues that mainline Protestantism is becoming increasingly 'green,' he also examines the theological basis for many fundamentalists' hostility toward the environmental movement. In addition, Fowler considers Protestantism's policy agendas for environmental change, as well as the impact on mainline Protestant thinking of modern eco-theologies, process and creation theologies, and ecofeminism.
