Transitions Theory Afaf I. Meleis, PhD, DrP5 (hon), FAAN 2010-02-17 "It is very exciting to see all of these studies compiled in one book. It can be read sequentially or just for certain transitions. It also can be used as a template for compilation of other concepts central to nursing and can serve as a resource for further studies in transitions. It is an excellent addition to the nursing literature." Score: 95, 4 Stars. --Doody's "Understanding and recognizing transitions are at the heart of health care reform and this current edition, with its numerous clinical examples and descriptions of nursing interventions, provides important lessons that can and should be incorporated into health policy. It is a brilliant book and an important contribution to nursing theory." Kathleen Dracup, RN, DNSc Dean and Professor, School of Nursing University of California San Francisco Afaf Meleis, the dean of the University of Pennsylvania School of Nursing, presents for the first time in a single volume her original "transitions theory" that integrates middle-range theory to assist nurses in facilitating positive transitions for patients, families, and communities. Nurses are consistently relied on to coach and support patients going through major life transitions, such as illness, recovery, pregnancy, old age, and many more. A collection of over 50 articles published from 1975 through 2007 and five newly commissioned articles, Transitions Theory covers developmental, situational, health and illness, organizational, and therapeutic transitions. Each section includes an introduction written by Dr. Meleis in which she offers her historical and practical perspective on transitions. Many of the articles consider the transitional experiences of ethnically diverse patients, women, the elderly, and other minority populations. Key Topics Discussed: Situational transitions, including discharge and relocation transitions (hospital to home, stroke recovery) and immigration transitions (psychological adaptation and impact of migration on family health) Educational transitions, including professional transitions (from RN to BSN and student to professional) Health and illness transitions, including self-care post heart failure, living with chronic illness, living with early dementia, and accepting palliative care Organization transitions, including role transitions from acute care to collaborative practice, and hospital to community practice Nursing therapeutics models of transition, including role supplementation models and debriefing models

Basic Geriatric Nursing Gloria Wold 2004 Part of the popular LPN Threads series, this concise text presents the theories and concepts of aging, the physiologic and psychosocial changes and problems associated with the process, and appropriate nursing interventions. With its easy-to-read, clear writing style, this text provides exactly the right depth and breadth of geriatrics content for LPN/LVNs. Clear, concise, consistent writing throughout. Nursing Process section (in appropriate chapters) provides a strong framework for the discussion of the nursing care of the elderly patient as related to specific disorders. Essential ethical and legal issues are presented as they relate to end-of-life care, restraints, and elder abuse. Clinical Situations provide individualized cases for students to study and learn from. Nursing Interventions are grouped according to health care setting to make it easier to determine the appropriateness of individual interventions for different patient populations. All-in-one Student Activities workbook is included in a perforated section at the back of the book and includes NCLEX-style multiple-choice questions as well as the new NCLEX-styled questions (short-answer and fill-in-the-blank) to help students review chapter content and prepare for the NCLEX exam(answers are found in the Instructor's Resource Manual). New chapter on end-of-life care addresses essential content for both institutional and the home setting, including information on palliative and hospice care, pain management, and how belief systems affect the dying person and caregivers. Delegation, leadership, and management content is integrated throughout to address the changing role of LPN/LVNs. Delegation Considerations boxes address such topics as restraints, elder abuse, and end-of-life care as related to responsibilities of nursing assistants and other health care workers who are supervised by LPN/LVNs. Second color added to the design adds visual appeal and helps to emphasize key content. Cultural Considerations boxes help students understand how to provide culturally sensitive patient care. Complementary and Alternative Therapy boxes address popular therapies that are used in pain relief and other treatments. Patient Teaching boxes instruct and inform both elderly patients and their caregivers about health promotion, prevention, and age-specific interventions. Critical Thinking boxes pose questions designed to stimulate thought and help students develop and improve their ability to think critically.

Authors Eleanor Schlenker and Sara Long address nutrition across the life span and within the community, with an emphasis on health promotion and the effects of culture and religion on nutrition. The revised edition has been updated with current government dietary guidelines, including the new MyPlate recommendations. Other key topics include childhood obesity, metabolic syndrome, diabetes, and food safety. Plus, evidence-based information and real-world case scenarios help you learn how to apply essential nutrition concepts and therapies in clinical practice. Case studies illustrate key concepts in authentic, "real-life" scenarios that reinforce learning and promote nutritional applications. Cultural Content boxes highlight the critical, yet often overlooked, role culture plays in nutrition – a role that is becoming more important as the population becomes more diverse. Feature boxes spotlight newsworthy issues related to the chapter topic, including: Diet-Medications Interactions – dietary warnings related to specific prescription drugs. Complementary and Alternative Medicine (CAM) – information on the uses, contraindications, and advantages/disadvantages of common herbs and supplements. Focus on Food Safety – important storage and preparation considerations for preventing food-borne illness. Health Promotion sections in each chapter emphasize the importance of health promotion and wellness as part of an effort to stress healthy lifestyle choices and prevention as the best "medicine." Websites of Interest at the end of every chapter lists reliable Internet resources for further study and exploration of various nutrition topics. Key terms are highlighted throughout the text with definitions on the same page for instant reference. Includes complimentary online access to Nutritrac 5.0, the latest version of Mosby's premier nutrition and exercise management program that features over 1,000 new foods and enhanced functionality. Evidence-Based Practice boxes emphasize the importance of using research to achieve the best possible patient outcomes. Expanded health promotion coverage includes the World Health Organization's definition of "health," the concept of wellness, and patient education. An in-depth discussion of childhood obesity explores the impact and prevention of this major health concern. Additional information on metabolic syndrome examines its effects on the cardiovascular system. Coverage of nutrition support includes the use of adapted feeding tools to aid patients in various disease states. Perspective in Practice boxes offer quick access to practical applications of nutrition principles. Choose Your Foods: Exchange Lists for Diabetes features the latest updates from the American Dietetic Association.
