Melothesia in Babylonia Markham Judah Geller 2014-11-10 This monograph begins with a puzzle: a Babylonian text from late 5th century BCE Uruk associating various diseases with bodily organs, which has evaded interpretation. The correct answer may reside in Babylonian astrology, since the development of the zodiac in the late 5th century BCE offered innovative approaches to the healing arts. The zodiac—a means of predicting the movements of heavenly bodies—transformed older divination (such as hemerologies listing lucky and unlucky days) and introduced more favorable magical techniques and medical prescriptions, which are comparable to those found in Ptolemy’s Tetrabiblos and non-Hippocratic Greek medicine. Babylonian melothesia (i.e., the science of charting how zodiacal signs affect the human body) offers the most likely solution explaining the Uruk tablet.

High Line Nudes 2016-05-10 From the foreword: “One of the High Line’s powers is its ability to evoke time, to remind us of the changes we’ve experienced during our own lives, to bring forth echoes of the past, and to make us guess what life might be like years from now. I love the photos on these pages, because they have that power, too.” --Joshua David, Co-Founder of the Friends of the High Line. Ten Avenues Press, in association with Friends of the High Line, announce the publication of High Line Nudes. In 2006, photographer Kevin McDermott took three of his friends up on the abandoned railroad tracks that would become New York City’s High Line park to shoot a series of nudes. As McDermott states in his introduction, “at the time I took these photos, what I sought from its beauty was its sense of isolation, being alone, surrounded by nature in the middle of this metropolis.” A decade later, this location is now one of the most visited tourist destinations in NYC and one of the largest real estate developments in the world. High Line Nudes captures a seemingly impossible, but beautiful moment in the history of the West Side Rail Yards, Chelsea and an ever changing New York City. The cloth hardcover book is beautifully printed in color and rich black and white duotone images.

Odes Sharon Olds 2016-09-08 'Interspersed with acts of breathtaking linguistic daring.' Charlotte Mendelson, Observer Book of the Year Opening with a powerful and tender 'Ode to the Hymen', Sharon Olds uses this age-old poetic form to address many aspects of herself, in a collection that is centred around the female body and female pleasures, and touches along the way on parts of her own story which will be familiar from earlier works, each episode and memory now burnished by the wisdom and grace of looking back. In such poems as 'Ode to My Sister', 'Ode of Broken Loyalty', 'Ode to My Whiteness', 'Blow Job Ode', 'Ode to the Last 38 Trees in New York City Visible from This Window', Olds treats us to an intimate self-examination that, like all her work, is universal and by turns searing and charming in its honesty. From the early bodily joys and sorrows of her girlhood to the recent deaths of those dearest to her – the 'Sheffield Mountain Ode' for Galway Kinnell is one of the most stunning pieces here - Olds shapes her world in language that is startlingly fresh, profound in its conclusions, and life-giving for the reader.

The Art of Failure Suresh Raval 2022-05-05 Originally published in 1986, this is a powerful and original book. It offers textual interpretation of Conrad’s major work and articulates the subtlety and richness of his treatment of social-political institutions and of the forces that complicate and distort private and public life. Suresh Raval argues that the social-personal relations in Conrad’s fiction cannot be conceived apart from their existence in the political life of a community; but at the same time they cannot be accommodated institutionally. The author’s concern is with the problematic status of the self under various perspectives: experience and understanding (Heart of Darkness), an ethical ideal (Lord Jim), history (Nostromo), ideology (The Secret Agent and Under Western Eyes), scepticism (Victory). What the self is remains ambiguous and elusive. Conrad’s fiction is concerned with exhibiting the failure of language, but always as a result of an immense effort of language itself. As language undoes itself in the act of seeking utterance, so Conrad’s fictional mode - romance - turns into the opposite of itself as it unfolds. Raval demonstrates that incompatible alternatives - intention and action, thought and experience, the individual and the social, the logical and the contingent - are entangled with each other, and how this entanglement works in the fiction. Raval’s exploration of Conrad’s scepticism shows why Conrad cannot be characterized as a political conservative or radical without distorting the complexity and seriousness of his reflection on society. For his scepticism is the product not just of intelligence but of intelligence conscious of its limitations, and is thus able to make a devastating critique of the nihilism sometimes attributed to Conrad by critics. Only those who think that morality has to have a secure single foundation if it is to be real are pushed into regarding Conrad’s scepticism as a form of nihilism. Professor Raval’s important study brings philosophical and literary interests to bear on Conrad’s major fiction and illuminates those aspects of his art which have puzzled and fascinated his readers. It will be deservedly valued by those studying and teaching modern literature.

Each chapter provides insight into the business of Hollywood, the motivations of filmmakers and also the pleasures for audiences, and offers a separate explanation for the whys of remaking. Utilizing an interdisciplinary approach, the author draws from existing literature, close readings of films and a dataset of hundreds of film reviews, to provide a taxonomy and deep-dive into six unique rationales for remaking premade titles: the better remake; the economic remake; the nostalgic remake; the Americanized remake; the creative remake; the fashionable remake. This unique examination of the industrial activity of remaking will be of great interest to academics and students working in the areas of film and adaptation studies, narrative, media discourse, transmedia storytelling, American cinema and cultural studies.

The Book of L G. Rozenberg 2012-12-06 This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been cus tomarily referred to as L systems.

Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the in terest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

Understanding William T. Vollman Isil Özcan 2019-11 In Understanding William T. Vollman, Isil Özcan studies the maturing career of one of the most important voices in contemporary letters. Vollmann's major works of fiction and nonfiction include his National Book Award winner, Europe Central; his highly acclaimed Seven Dreams novels; and his magnum opus, Rising Up and Rising Down: Some Thoughts on Violence, Urgent Means, and Justifications. Özcan examines the common threads that interlace Vollmann's corpus and grapples with the depth and complexity of his massive output. In her readings of Vollmann's works, she identifies a rich but accessible set of themes that he explores afresh in each text, including death, war, violence, suffering, and love. Vollmann has written in many genres, and his writing is informed by his extensive research and travels around the world, his familiarity with red-light zones, and his war correspondence. The highly subjective and participative nature of much his writing has foregrounded his personality to such an extent that he became simultaneously a cult figure and a notorious adventurer. In her readings Özcan contends that Vollmann compels our attention because he registers a diversity of voices and discourses that makes us hear what the subjugated, the unrecognized, the weak, and the marginalized have to say; the scope and the force of Vollmann's openness to the Other is inseparable from his method and conduct. In addition to close readings of Vollmann's texts, Özcan also examines his influences and literary connections, tracing his ties to John Steinbeck, Ernest Hemingway, James Agee, and Danilo Kis and situating him not only in the American canon but also in the longer duration of world literature.

Tesol and the Cult of Speed in the Age of Neoliberal Mobility Osman Barnawi 2021-09-30 TESOL and the Cult of Speed in the Age of Neoliberal Mobility argues that because the nexus between TESOL and the cult of speed in an age of increased neoliberal mobility has not yet been explicitly unpacked, discussed, identified and theorized, the implications of this socio-economic phenomenon for TESOL policies, curricula, pedagogies and practices have been overlooked. Through the presentation of several qualitative case studies, the book illustrates the social dynamics of speed and its key aspects (i.e., the materiality and the politics of time) in different TESOL contexts, including Saudi Arabia, the USA and Canada. The aim in presenting these diverse case studies was to craft a collection of responses, which, when put together, could offer new insights into the TESOL academic community. The book examines the ways in which the cult of speed has been envisioned, celebrated, negotiated with, enacted and justified by the various actors within the contemporary field of TESOL. It also investigates the new language teaching practices and forms the cult of speed in TESOL has generated and is generating. TESOL and the Cult of Speed in the Age of Neoliberal Mobility will be of interest to TESOL/applied linguistics educators, students, policy makers, administrators, employers and the wider community, and it is hoped will give them ideas about how to deal with today’s culture of fast movement in the globalized higher education landscape.
