Rice and Beans Richard Wilk 2013-05-09 Rice and Beans is a book about the paradox of local and global. On the one hand, this is a globe-spanning dish, a simple source of complete nutrition for billions of people in hundreds of

countries. On the other hand, in every place people insist that rice and beans is a local invention, deeply rooted in a particular history and culture. How can something so universal also be so particular? The authors of this book explore the specific history of the versions of rice and beans beloved and indigenous in cultures from Brazil to West Africa. But they also plumb the shared African, Native American and European trans-Atlantic encounters and exchanges, and the contemporary forces of globalization and nation-building, which combine to make rice and beans a powerful substance and symbol of the relationship between food and culture.

Agrifood System Transitions in Brazil Paulo André

Niederle 2020-10-29 This book explores the agrifood system transitions in Brazil to provide a new understanding of the trajectory of agriculture and rural development in this country. It accentuates the increasing diversification and hybridization of food production and consumption

practices throughout history. With a framework that combines convention theory, neoinstitutional approaches and practice theory, this book suggests the concept of “food orders” which represents different arrangements of practices, institutions and sociotechnical artifacts. By exploring the interrelations between these elements, the book looks at six different food orders: industrial, commercial, domestic, aesthetic, civic and financial, in tandem with examples of practices, sectors and territories to understand the dynamics of each one. This aids in understanding the main tendencies of the agrifood sector in such a vast country that, being a major player in global food markets, also affect production and consumption dynamics in several other countries. Besides, this book also seeks to comprehend the current institutional changes in Brazil that may be critical to interpret the global dissemination of populist and autocratic governments. Offering key insights into the contemporary sociology of agriculture and food, this book demonstrates how strengthening democracy and supporting the organization of civil society are major challenges when we think about transition for sustainable food systems.
