East Asia in the World Stephan Haggard 2020-10-29 This accessible collection examines twelve historic events in the international relations of East Asia.

Europe's India Sanjay Subrahmanyam 2017-03-13 When Portuguese explorers first arrived in India, the maritime passage initiated an exchange of goods as well as ideas. European ambassadors, missionaries, soldiers, and scholars who followed produced a body of knowledge that shaped European thought about India. Sanjay Subrahmanyam tracks these changing ideas over the entire early modern period.

**Eastern Asia** Colin Mackerras 2000-01 'Eastern Asia' is a survey of the history of East and South East Asia from the sixteenth century to the present. It also offers a broad overview and summary of key cultural, political, economic and religious practices and influences in six Asian nations - China, Japan, Indonesia, Korea, Vietnam and Thailand. The last two chapters present an Australian perspective, as they are devoted to Australia's relations with, and perceptions of Asia. This text contains a first class list of contributors, many of who are regarded as authorities in their field of research and teaching.

*The Oxford History of the British Empire: Volume II: The Eighteenth Century* P. J. Marshall 2001-07-26 Volume II of *The Oxford History of the British Empire* examines the history of British worldwide expansion from the Glorious Revolution of 1689 to the end of the Napoleonic Wars, a crucial phase in the creation of the modern British Empire. This is the age of General Wolfe, Clive of India, and Captain Cook. An international team of experts deploy the latest scholarly research to trace and analyze development and expansion over more than a century. They show how trade, warfare, and migration created an Empire, at first overwhelmingly in the Americas but later increasingly in Asia. Although the Empire was ruptured by the American Revolution, it survived and grew into the British Empire that was to dominate the world during the nineteenth and early twentieth centuries. Series Blurb *The Oxford History of the British Empire* is a major new assessment of the Empire in the light of recent scholarship and the progressive opening of historical records. From the founding of colonies in North America and the West Indies in the seventeenth century to the reversion of Hong Kong to China at the end of the twentieth, British imperialism was a catalyst for far-reaching change. *The Oxford History of the British Empire* as a comprehensive study allows us to understand the end of Empire in relation to its beginnings, the meaning of British imperialism for the ruled as well as the rulers, and the significance of the British Empire as a theme in world history.

The Political Economy of Merchant Empires James D. Tracy 1997-09-13 This book focuses on why Europe became the dominant economic force in global trade between 1450 and 1750.

*The Portuguese in India and Other Studies, 1500-1700* DISNEY 2018-12-19 The studies brought together in this volume were published over the last thirty years and are concerned, directly or indirectly, with the Portuguese presence in India between about 1500 and 1650. They have been arranged into four groups of which the first, 'The Portuguese in India', includes pieces on the changing character of the empire in India, Goa in the 17th century, the Portuguese India Company of 1628-33, smugglers, the great famine of the early 1630s and the ceremonial induction process for new viceroys. A second group focuses on the life, career and background of the count of Linhares, before, during and after his term as viceroy at Goa. The third group consists of studies on travel and communications between India and Portugal, both by sea and by land. The collection concludes with studies under the heading of 'historiography and problems of interpretation', on Charles Boxer as a biographer, and on Vasco da Gama's reputation for violence.

Asia in the Making of Europe Donald Frederick Lach 1998 This monumental series, acclaimed as a "masterpiece of comprehensive scholarship" in the *New York Times Book Review*, reveals the impact of Asia's high civilizations on the development of modern Western society. The authors examine the ways in which European encounters with Asia have altered the development of Western society, art, literature, science, and religion since the Renaissance. In Volume III: *A Century of Advance*, the authors have researched seventeenth-century European writings on Asia in an effort to understand how contemporaries saw Asian societies and peoples.

**European Commercial Enterprise in Pre-Colonial India** Om Prakash 1998-06-28 This book considers the impact of European trade on the pre-modern Indian economy.

*The Portuguese Empire, 1415-1808* A. J. R. Russell-Wood 1998-07-31 By approaching the history of the Portuguese empire thematically, historian A.J.R. Russell-Wood paints a broad portrait of the first and one of the greatest colonial empires--its birth, apotheosis, and decline. Russell-Wood shows unique insight into the diversity and balance between competing interests and priorities that characterized the Portuguese culture and its expansion, spanning four centuries's events on four different continents. 84 illustrations.

Assembling the Tropics Hugh Cagle 2018-08-31 This book charts the convergence of science, culture, and politics across Portugal's empire, showing how a global geographical concept was born. In accessible, narrative prose, this book explores the unexpected forms that science took in the early modern world. It highlights little-known linkages between Asia and the Atlantic world.

*Twilight of the Pepper Empire* A. R. Disney 2010 This study of the Portuguese commercial empire in India during the Hapsburg years is the most serious attempt yet made to analyse the Old Portuguese pepper trade—from the planting of orchards in the foothills of Malabar and

Kanara to the unloading of spice-laden carracks in Lisbon. Equally significant, it is the first book to explain how and why the Portuguese were not able to modernize their trade system when faced with crisis conditions. The distress that confronted the Portuguese following the arrival of the Dutch and English, seen here as partly military but fundamentally economic and organizational, reached its decisive stage in the 1620s and the early 1630s. The Portuguese attempted to combat the crisis by creating their own India Company. The story of that company and the reasons of its failure are thoroughly investigated as Disney looks at its antecedents, composition, activities, and weaknesses. The author has unearthed much new statistical material from widely scattered manuscript sources and in doing so sheds new light on related problems and issues, such as institutional relations between Spain and Portugal, the careers of individual merchants, and the nature and difficulties of viceregal government in Portuguese India.

**Beyond Empires: Global, Self-Organizing, Cross-Imperial Networks, 1500-1800** 2016-06-06 Beyond Empires explores the complexity of empire building from the point of view of self-organized cooperative networks, rather than from the point of view of the central state.

**The Career and Legend of Vasco Da Gama** Sanjay Subrahmanyam 1998-10-29 Presents the life and career of Portuguese explorer Vasco da Gama focusing on a blend of the facts and legends around him.

**The Portuguese Empire in Asia, 1500-1700** Sanjay Subrahmanyam 1993 Portugal, a tiny nation with around a million inhabitants, created a world empire between the 15th and 17th centuries which left vestiges in Africa and Asia as late as the 1970s. To illuminate the Asian dimension of this empire - to show how it came into being and how it changed over time - Dr Subrahmanyam explores the interaction of international and local factors in Europe, Asia and Africa alike. This is a contribution to the early modern history of Asia; as well as to the study of European expansion.

**The Portuguese Empire in Asia, 1500-1700** Sanjay Subrahmanyam 2012-04-30 Featuring updates and revisions that reflect recent historiography, this new edition of *The Portuguese Empire in Asia 1500-1700* presents a comprehensive overview of Portuguese imperial history that considers Asian and European perspectives. Features an argument-driven history with a clear chronological structure Considers the latest developments in English, French, and Portuguese historiography Offers a balanced view in a divisive area of historical study Includes updated Glossary and Guide to Further Reading

**The Ottoman Age of Exploration** Giancarlo Casale 2010-02-25 In 1517, the Ottoman Sultan Selim "the Grim" conquered Egypt and brought his empire for the first time in history into direct contact with the trading world of the Indian Ocean. During the decades that followed, the Ottomans became progressively more engaged in the affairs of this vast and previously unfamiliar region, eventually to the point of launching a systematic ideological, military and commercial challenge to the Portuguese Empire, their main rival for control of the lucrative trade routes of maritime Asia. *The Ottoman Age of Exploration* is the first comprehensive historical account of this century-long struggle for global dominance, a struggle that raged from the shores of the Mediterranean to the Straits of Malacca, and from the interior of Africa to the steppes of Central Asia. Based on extensive research in the archives of Turkey and Portugal, as well as materials written on three continents and in a half dozen languages, it presents an unprecedented picture of the global reach of the Ottoman state during the sixteenth century. It does so through a dramatic recounting of the lives of sultans and viziers, spies, corsairs, soldiers-of-fortune, and women from the imperial harem.

Challenging traditional narratives of Western dominance, it argues that the Ottomans were not only active participants in the Age of Exploration, but ultimately bested the Portuguese in the game of global politics by using sea power, dynastic prestige, and commercial savoir faire to create their own imperial dominion throughout the Indian Ocean.

**The Economic History of India 1857-1947** Tirthankar Roy 2006-10-05 This comprehensive and updated textbook on the economic history of colonial India presents a lucid account of the factors that shaped economic change in colonial India in the late-nineteenth and early-twentieth centuries.

**Improvising Empire** Sanjay Subrahmanyam 1990 While the general outline of the history of Portuguese expansion in Asia is rather well-known, many areas that were hubs of trade and settlement have been only briefly studied. One of the most conspicuous of those is the Bay of Bengal, where the Portuguese had an important official and unofficial presence in the sixteenth and seventeenth centuries. The product of extensive research in Indian, Portuguese, and Netherland archives, this collection of essays is the first substantial treatment of the Portuguese presence in the Bay of Bengal. The work of an economic historian, the volume offers important insight into the nature of early modern European expansion and imperialism, urban history, and colonial social history.

**A History of Portugal and the Portuguese Empire** Anthony

R. Disney 2009

From Anatolia to Aceh Andrew Peacock 2015-01-01

Southeast Asia has long been connected by trade, religion and political links to the wider world across the Indian Ocean, and especially to the Middle East through the faith of Islam. However, little attention has been paid to the ties between Muslim Southeast Asia - encompassing the modern nations of Indonesia, Malaysia, Brunei, Singapore and the southern parts of Thailand and the Philippines - and the greatest Middle Eastern power, the Ottoman empire. The first direct political contact took place in the 16th century, when Ottoman records confirm that gunners and gunsmiths were sent to Aceh in Sumatra to help fight against the Portuguese domination of the pepper trade. In the intervening centuries, the main conduit for contact between was the annual Hajj pilgrimage, and many Malay pilgrims from Southeast Asia spent long periods of study in the holy cities of Mecca and Medina, which were under Ottoman control from 1517 until the early 20th century. During the period of European colonial expansion in the 19th century, once again Malay states turned to Istanbul for help. It now appears that these demands for intervention from Southeast Asia may even have played an important role in the development of the Ottoman policy of Pan-Islamism, positioning the Ottoman emperor as Caliph and leader of Muslims worldwide and promoting Muslim solidarity. The papers in this volume represent the first attempt to bring together research on all aspects of the relationship between the Ottoman world and Southeast Asia - political, economic, religious and intellectual - much of it based on documents newly discovered in archives in Istanbul.

**The Cambridge World History** Jerry H. Bentley 2015-04-09

**The Industrial Revolution: A Very Short Introduction**

Robert C. Allen 2017-02-16 The 'Industrial Revolution' was a pivotal point in British history that occurred between the mid-eighteenth and mid-nineteenth centuries and led to far reaching transformations of society. With the advent of revolutionary manufacturing technology productivity boomed. Machines were used to spin and weave cloth, steam engines were used to provide reliable power, and industry was fed by the construction of the first railways, a great network of arteries feeding the factories. Cities grew as people shifted from agriculture to industry and commerce. Hand in hand with the growth of cities came rising levels of pollution and disease. Many people lost their jobs to the new machinery, whilst working conditions in the factories were grim and pay was low. As the middle classes prospered, social unrest ran through the working classes, and the exploitation of workers led to the growth of trade unions and protest movements. In this Very Short Introduction, Robert C. Allen analyzes the key features of the Industrial Revolution in Britain, and the spread of industrialization to other countries. He considers the factors that combined to enable industrialization at this time, including Britain's position as a global commercial empire, and discusses the changes in technology and business organization, and their impact on different social classes and groups. Introducing the 'winners' and the 'losers' of the Industrial Revolution, he looks at how the changes were reflected in evolving government policies, and what contribution these made to the economic transformation. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

*Connected History* Sanjay Subrahmanyam 2022-01-04

A collection of essays that span many regions and cultures, by an award-winning historian Sanjay Subrahmanyam is becoming well known for the same sort of reasons that attach to Fernand Braudel and Carlo Ginzburg, as the proponent of a new kind of history - in his case, not *longue durée* or micro-history, but 'connected history': connected cross-culturally, and spanning regions, subjects and archives that are conventionally treated alone. Not a research paradigm, he insists, it is more of an *oppositions-wissenschaft*, a way of trying to constantly break the moulds of historical objects. The essays collected here, some quite polemical - as in the lead text on the notion of India-as-civilization, or another, assessing such a literary totem as V. S. Naipaul - illustrate the breadth of Subrahmanyam's concerns, as well as the quality of his writing. *Connected History* considers what, exactly, is an empire, the rise of 'the West' (less of a place than an idea or ideology, he insists), Churchill and the Great Man theory of history, the reception of world literature and the itinerary of subaltern studies, in addition to personal recollections of life and work in Delhi, Paris and Lisbon, and concluding remarks on the practice of early-modern history and the framing of historical enquiry.

**The Eighteenth Century** Peter James Marshall 2001

Continuing Oxford's five-volume comprehensive history of the British Empire, Volume II examines the history of British expansion from the Glorious Revolution of 1689 to the end of the Napoleonic Wars, a crucial phase in the creation of the modern British Empire. 13 maps.

*On the Origins of Global History* Sanjay Subrahmanyam

2016-03-17 How does one think of history on a world scale? Should one turn to the intellectuals of the past or the historians of the present? Universal history as it was practised from Antiquity started to change from the sixteenth century in varied contexts, from East Asia to Spanish America. Applying his extensive knowledge of archives across the world and his command of languages and historiographic traditions of Asia, Europe and the Americas, Sanjay Subrahmanyam considers the history of networks and exchanges of goods, myths and ideologies from a new perspective. He works outside traditional geopolitical frameworks based on the nation-state model, to present global history as a field defined and redefined by "connected histories".

(Dis)connected Empires Zoltán Biedermann 2018-10-25

(Dis)connected Empires takes the reader on a global journey to explore the triangle formed during the sixteenth century between the Portuguese empire, the empire of Kotte in Sri Lanka, and the Catholic Monarchy of the Spanish Habsburgs. It explores nine decades of connections, cross-cultural diplomacy, and dialogue, to answer one troubling question: why, in the end, did one side decide to conquer the other? To find the answer, Biedermann explores the imperial ideas that shaped the politics of Renaissance Iberia and sixteenth-century Sri Lanka. (Dis)connected Empires argues that, whilst some of these ideas and the political idioms built around them were perceived as commensurate by the various

parties involved, differences also emerged early on. This prepared the ground for a new kind of conquest politics, which changed the inter-imperial game at the end of the sixteenth century. The transition from suzerainty-driven to sovereignty-fixated empire-building changed the face of Lankan and Iberian politics forever, and is of relevance to global historians at large. Through its scrutiny of diplomacy, political letter-writing, translation practices, warfare, cartography, and art, (Dis)connected Empires paints a troubling panorama of connections breeding divergence and leading to communicational collapse. It examines a key chapter in the pre-history of British imperialism in Asia, highlighting how diplomacy and mutual understandings can, under certain conditions, produce conquest.

**The Cambridge World History: Volume 6, The Construction of a Global World, 1400–1800 CE, Part 1, Foundations**

Jerry H. Bentley 2015-04-09 The era from 1400 to 1800 saw intense biological, commercial, and cultural exchanges, and the creation of global connections on an unprecedented scale. Divided into two books, Volume 6 of the Cambridge World History series considers these critical transformations. The first book examines the material and political foundations of the era, including global considerations of the environment, disease, technology, and cities, along with regional studies of empires in the eastern and western hemispheres, crossroads areas such as the Indian Ocean, Central Asia, and the Caribbean, and sites of competition and conflict, including Southeast Asia, Africa, and the Mediterranean. The second book focuses on patterns of change, examining the expansion of Christianity and Islam, migrations, warfare, and other topics on a global scale, and offering insightful detailed analyses of the Columbian exchange, slavery, silver, trade, entrepreneurs, Asian religions, legal encounters, plantation economies, early industrialism, and the writing of history.

The Iberian World Fernando Bouza 2019-09-18 The Iberian World: 1450–1820 brings together, for the first time in English, the latest research in Iberian studies, providing in-depth analysis of fifteenth- to early nineteenth-century Portugal and Spain, their European possessions, and the African, Asian, and American peoples that were under their rule. Featuring innovative work from leading historians of the Iberian world, the book adopts a strong transnational and comparative approach, and offers the reader an interdisciplinary lens through which to view the interactions, entanglements, and conflicts between the many peoples that were part of it. The volume also analyses the relationships and mutual influences between the wide range of actors, polities, and centres of power within the Iberian monarchies, and draws on recent advances in the field to examine key aspects such as Iberian expansion, imperial ideologies, and the constitution of colonial societies. Divided into four parts and combining a chronological approach with a set of in-depth thematic studies, The Iberian World brings together previously disparate scholarly traditions surrounding the history of European empires and raises awareness of the global dimensions of Iberian history. It is essential reading for students and academics of early modern Spain and Portugal.

**Conflict and Conversion** Tara Alberts 2013-10-03 Conflict and Conversion explores how Catholic missionaries, merchants, and adventurers brought their faith to the strategically and commercially crucial region of Southeast Asia in the sixteenth and seventeenth centuries. This region conjured visions of the exotic in the minds of early modern Europeans, and became an important testing ground for ideas about the nature of conversion and the relationship between religious belief and practice. Some Southeast Asians adopted Christianity - and even died for their new faith - while others

resisted all incentives, menaces, and cajolement to reject their original spiritual beliefs and practices. In this volume, Tara Alberts explores how Catholicism itself was converted in this encounter, as Southeast Asian neophytes adapted the faith to their own needs. Conflict and Conversion makes the first detailed exploration of Catholic missions to the diverse kingdoms of Southeast Asia and provides a new connective history of the spread of global Christianity to this crossroads of the world. This volume focuses on three areas which represent the main cultural and religious divisions of the broader region of Southeast Asia: modern-day Thailand, Vietnam and Malaysia. In each of these areas, missionaries had to engage with a variety of political and economic systems, social norms, and religious beliefs and practices. They were obliged to consider what adaptations could be made to Catholic ritual and devotions in order to satisfy local needs, and how best to counter local customs deemed inimical to the faith, which obliged them to engage with fundamental questions about what it meant to be Christian. Alberts seeks to uncover the conflicts over these issues, and the development of the concept of conversion in the early modern period.

**The Company-State** Philip J. Stern 2012-11-29 The Company-State offers a political and intellectual history of the English East India Company in the century before its acquisition of territorial power. It argues the Company was no mere merchant, but a form of early modern, colonial state and sovereign that laid the foundations for the British Empire in India.

Empires of the Weak J C Sharman 2020-11-10 What accounts for the rise of the state, the creation of the first global system, and the dominance of the West? The conventional answer asserts that superior technology, tactics, and institutions forged by Darwinian military competition gave Europeans a decisive advantage in war over other civilizations from 1500 onward. In contrast, Empires of the Weak argues that Europeans actually had no general military superiority in the early modern era. J. C. Sharman shows instead that European expansion from the late fifteenth to the late eighteenth centuries is better explained by deference to strong Asian and African polities, disease in the Americas, and maritime supremacy earned by default because local land-oriented polities were largely indifferent to war and trade at sea. Europeans were overawed by the mighty Eastern empires of the day, which pioneered key military innovations and were the greatest early modern conquerors. Against the view that the Europeans won for all time, Sharman contends that the imperialism of the late nineteenth and early twentieth centuries was a relatively transient and anomalous development in world politics that concluded with Western losses in various insurgencies. If the twenty-first century is to be dominated by non-Western powers like China, this represents a return to the norm for the modern era. Bringing a revisionist perspective to the idea that Europe ruled the world due to military dominance, Empires of the Weak demonstrates that the rise of the West was an exception in the prevailing world order.

**The Portuguese and the Straits of Melaka, 1575-1619**

Paulo Jorge De Sousa Pinto 2012-03-01 Following the fall of the Melaka Sultanate to the Portuguese in 1511, the sultanates of Johor and Aceh emerged as major trading centers alongside Portuguese Melaka. Each power represented wider global interests. Aceh had links with Gujerat, the Ottoman Empire and the Levant. Johor was a center for Javanese merchants and others involved with the Eastern spice trade. Melaka was part of the Estado da India, Portugal's trading empire that extended from Japan to Mozambique. Throughout the sixteenth century, a peculiar balance among the three powers became an important character of the political and economical life in the Straits of Melaka. The arrival of the Dutch in

the early seventeenth century upset the balance and led to the decline of Portuguese Melaka. Making extensive use of contemporary Portuguese sources, Paulo Pinto uses a geopolitical approach to analyze the financial, political, economic and military institutions that underlay this triangular arrangement, a system that persisted because no one power could achieve an undisputed hegemony. He also considers the position of post-conquest Melaka in the Malay World, where it remained a symbolic center of Malay civilization and a model of Malay political authority despite changes associated with Portuguese rule. In the process provides information on the social, political and genealogical circumstances of the Johor and Aceh sultanates.

Women in the Portuguese Colonial Empire Clara Sarmiento 2009-03-26 Women in the Portuguese Colonial Empire: The Theatre of Shadows compiles an extensive collection of essays on the status of women throughout the vast Portuguese colonial space, from Brazil to the Far East, crossing Europe, Africa and India, between the 16th and the 20th century. Absent or mystified, silenced or victimized, women in the History of Portugal and its colonial venture are the living example of the part historiographical discourse, ideology and popular memory have played in the construction of identities, their practices and representations. The production and critical consumption of History have long revealed countless gaps and silences within its own discourse. This book questions the reason for such gaps and silences and wonders about the real role of all those who do not or have never had access to power and to the perpetuating word, those whose voices have been systematically erased from sources and documents because of past or present attending interests. Women in the Portuguese Colonial Empire: The Theatre of Shadows congregates a wide assortment of disciplines so as to provide multiple independent viewpoints, sources and methodologies. By bringing authors from around the world together, this work ensures that the various cultures and memories that are part of the global saga, as well as the various versions of the history of the Portuguese colonial empire, may be heard.

**Empires between Islam and Christianity, 1500-1800** Sanjay Subrahmanyam 2018-12-27 A wide-ranging consideration of early modern Muslim and Christian empires, covering the Iberian, Ottoman and Mughal worlds, including questions of political economy, images and representations, and historiography. Empires Between Islam and Christianity,

1500–1800 uses the innovative approach of “connected histories” to address a series of questions regarding the early modern world in the Indian Ocean, the Mediterranean, and the Atlantic. The period between 1500 and 1800 was one of intense inter-imperial competition involving the Iberians, the Ottomans, the Mughals, the British, and other actors. Rather than understand these imperial entities separately, Sanjay Subrahmanyam reads their archives and texts together to show unexpected connections and refractions. He further proposes, in this set of closely argued studies, that these empires often borrowed from each other, or built their projects with knowledge of other competing visions of empire. The emphasis on connections is also crucial for an understanding of how a variety of genres of imperial and global history writing developed in the early modern world. The book moves creatively between political, economic, intellectual, and cultural themes to suggest a fresh geographical conception for the epoch. Sanjay Subrahmanyam is Distinguished Professor and Irving and Jean Stone Chair in the Department of History at the University of California, Los Angeles. He is the author of several books, including *The Political Economy of Commerce: Southern India, 1500–1650*.

*Iberian World Empires and the Globalization of Europe 1415–1668* Bartolomé Yun-Casalilla 2019-03-13 This open access book analyses Iberian expansion by using knowledge accumulated in recent years to test some of the most important theories regarding Europe’s economic development. Adopting a comparative perspective, it considers the impact of early globalization on Iberian and Western European institutions, social development and political economies. In spite of globalization’s minor importance from the commercial perspective before 1750, this book finds its impact decisive for institutional development, political economies, and processes of state-building in Iberia and Europe. The book engages current historiographies and revindicates the need to take the concept of composite monarchies as a point of departure in order to understand the period’s economic and social developments, analysing the institutions and societies resulting from contact with Iberian peoples in America and Asia. The outcome is a study that nuances and contests an excessively-negative yet prevalent image of the Iberian societies, explores the difficult relationship between empires and globalization and opens paths for comparisons to other imperial formations.
