The Book of L
G. Rozenberg 2012-12-06 This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been cus tomarily referred to as L systems. Lindenmayer’s invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the in terest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here “0” stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with “oh” rather than “zero”, and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling “DOL” of “DOL” could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

Recovering Armenia
Lerna Ekmekcioğlu 2016-01-06 Recovering Armenia offers the first in-depth study of the aftermath of the 1915 Armenian Genocide and the Armenians who remained in Turkey. Following World War I, as the victorious Allied powers occupied Ottoman territories, Armenian survivors returned to their hometowns optimistic that they might establish an independent Armenia. But Turkish resistance prevailed, and by 1923 the Allies withdrew, the Turkish Republic was established, and Armenians were left again to reconstruct their communities within a country that still considered them traitors. Lerna Ekmekcioğlu investigates how Armenians recovered their identity within these drastically changing political conditions. Reading Armenian texts and images produced in Istanbul from the close of WWI through the early 1930s, Ekmekcioğlu gives voice to the community’s most prominent public figures, notably Hayganush Mark, a renowned activist, feminist, and editor of the influential journal Hay Gin. These public figures articulated an Armenianness sustained through gendered differences, and women came to play a central role preserving traditions, memory, and the mother tongue within the home. But even as women were being celebrated for their traditional roles, a strong feminist movement found opportunity for leadership within the community. Ultimately, the book explores this paradox: how someone could be an Armenian and a feminist in post-genocide Turkey when, through its various laws and regulations, the key path for Armenians to maintain their identity was through traditionally gendered roles.

Law: A Very Short Introduction
Raymond Wacks 2008-03-27 Law underlies our society - it protects our rights, imposes duties on each of us, and establishes a framework for the conduct of almost every social, political, and economic activity. The punishment of crime, compensation of the injured, and the enforcement of contracts are merely some of the tasks of a modern legal system. It also strives to achieve justice, promote freedom, and protect our security. The result is a system that, while it touches all of our daily lives, is properly understood by only a few, with its impenetrable jargon, obsolete procedures, and interminable stream of Byzantine statutes and judgments of the courts. This clear, jargon-free Very Short Introduction aims to redress that balance, as it introduces the essentials of law and legal systems in a lively, accessible, and stimulating manner. Explaining the main concepts, terms, and processes of the legal system, it focuses on the Western tradition (the common law and the civil law), but also includes discussions of other legal systems, such as customary law and Islamic law. And it looks to the future too, as globalization and rapid advances in technology place increasing strain on our current legal system. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

The Last Suppers
Mandy Mikulencak 2018 Set in 1950s Louisiana, Mandy Mikulencak’s beautifully written and emotionally moving novel evokes both The Help

and Dead Man Walking with the story of an unforgettable woman whose quest to provide meals for death row prisoners leads her into the secrets of her own past. Many children have grown up in the shadow of Louisiana’s Greenmount State Penitentiary. Most of them—sons and daughters of corrections officers and staff—left as soon as they could. Yet Ginny Polk chose to come back to work as a prison cook. She knows the harsh reality of life within those walls—the cries of men being beaten, the lines of shuffling inmates chained together. Yet she has never seen them as monsters, not even those sentenced to execution. That’s why Ginny has taken on a special responsibility: preparing their last meals. Pot roast or red beans and rice, coconut cake or pork neck stew. . . . whatever the men ask for Ginny prepares, even meeting with their heartbroken relatives to get each recipe just right. The prison board frowns upon the ritual, as does Roscoe Simms, Greenmount’s Warden. Her daddy’s best friend before he was murdered, Roscoe has always watched out for Ginny, and their friendship has evolved into something deep and unexpected. But when Ginny stumbles upon information about the man executed for killing her father, it leads to a series of dark and painful revelations. Truth, justice, mercy—none of these are as simple as Ginny once believed. And the most shocking crimes may not be the ones committed out of anger or greed, but the sacrifices we make for love. "A haunting study of race relations, compassion, and mystery. A must read." --Library Journal (Starred Review)

Lerna in the Argolid
John Langdon Caskey 1997 Situated on the shores of the Argolic Gulf, only a few miles away from the much later prehistoric sites of Mycenae, Tiryns, and Midea, Lerna is one of the key building blocks in our understanding of Greek archaeology. The first evidence from the site is Neolithic, and the latest settlement evidence is Mycenaean. However, the most important material from the site comes from the middle of the 3rd millennium B.C. when a remarkable large, rectangular building known as The House of the Tiles was built. Possibly never finished, with unpainted walls and doors that lead nowhere, and the latest settlement evidence is Mycenaean. However, the most important material from the site comes from the middle of the 3rd millennium B.C. when a remarkable large, rectangular building known as The House of the Tiles was built. Possibly never finished, with unpainted walls and doors that lead nowhere, the purpose and meaning of this building has provoked vigorous debate. Was it the house of a chief and the precursor of the later Mycenaean palaces? Or was it a communal storage facility, designed to store the elaborately sealed chests and jars found inside? No less mysterious than its use is its destruction: After a violent fire, a huge mound was built on top of the charred foundations, the area avoided by later house builders. This guide is illustrated with many plans and black and white photos.

Radar Instruction Manual
United States. Maritime Administration 2005 Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies.Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration’s three region schools.It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardized up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook.This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation.Robert J. Pediatric Colorectal Surgery
Marc A Levitt 2022-03-28 Based on 30 years of experience as a surgeon working in the field of pediatric colorectal and pelvic reconstructive surgery, author Marc Levitt shares the tips and tricks that he has developed to make operations and patient management easier and reproducible. This book teaches these skills to achieve positive results. Patients with anorectal malformations (ARMs), Hirschsprung disease (HD), fecal incontinence from a variety of conditions, colonic motility disorders, and a myriad of other conditions comprise the field of pediatric colorectal and pelvic reconstruction. Such patients require care throughout their lives from specialists across numerous fields, which may include colorectal surgery, urology, gynecology, and GI motility, as well as specialized nursing, orthopedics, neurosurgery, anesthesia, pathology, radiology, psychology, social work, and nutrition. Sometimes the field can seem chaotic and unpredictable. Reconstruction requires creativity and at times it feels that artwok is being created during the actual operation with no pre-plan in mind. Marc Levitt and his colleagues have worked very hard to counter that feeling, to be fully prepared, and to develop protocols, techniques, and processes that can be adopted by other clinicians, so that optimal results for patients can be achieved. This book reflects both this experience and this approach.
